

## Global Quality Policy

### **POLICY STATEMENT**

Inventus Power is committed to providing quality products to our customers.

To ensure we meet our commitments, we will maintain an effective quality management system that supports our goal of meeting the needs of our customers, our business, and the requirements of our regulatory obligations through the continual improvement of our processes.

To drive this improvement, we have defined key “Betterment” metrics for which goals have been set. Performance is tracked and improvement plans are reviewed with management on a regular basis.
